

GRANEX®

innovative solution

for acne and rosacea management

GRANEX® acts quickly and effectively on 100% of the problems caused by acne vulgaris and rosacea, gradually improving and normalizing the skin.

GRANEX® contains:

- **Glycyrrhizinic acid:**
 - Anti-ulcer effect.
 - Anti-inflammatory action.
 - Antibacterial action.
 - Antiviral action (inhibition of viral DNA and RNA).
 - **Decreases the number of comedones and contributes to their reconstruction.**
- **Aloe vera:**
 - **It has antiseptic and healing properties;** Counteracts the action of dermal bacteria by dissolving fat deposits in the follicle. It destroys dead cells so they can be removed. It also regulates the pH in the three layers of the skin.
 - **It acts as an integral dermal regenerator;** Its natural nutrients help regenerate the cells of all the layers of the skin, acting as a deep and protective moisturizer.
 - **It has a keratolytic activity demonstrated by its salicylic acid content.**

Proven efficacy in 93% of treated cases

**Total absence of recurrences for
8 weeks**

1
